

# Monitoring Violations Annual Notice – Template 3-1B

## IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

### Monitoring Requirements Not Met for City of Waller

Our system failed to collect every required coliform sample. Although this incident was not an emergency, as our customers, you have a right to know what happened and what we did (are doing) to correct this situation.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During December 2023 we did not complete all monitoring or testing for coliform bacteria and therefore cannot be sure of the quality of your drinking water during that time.

#### What should I do?

There is nothing you need to do at this time. You may continue to drink the water. If a situation arises where the water is no longer safe to drink, we are required to notify you within 24 hours.

#### What is being done?

Our System requirements changed from four samples being taken to six samples being taken monthly. This was initiated in the month of December 2023. Only four samples were collected in December 2023 yet in January 2024 we collected every required coliform sample and are no longer in violation. Our Sampling routine from henceforth of January 2024 will be six samples.

For more information, please contact Markus Benoit at 936-372-3880 or 1218 Farr St. Waller, Tx 77484.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

This notice is being sent to you by City of Waller. Public Water System ID#: 2370003.  
Date distributed: 2/25/2024.
