

To: City of Waller Natural Gas Customers

From: City of Waller Municipal Gas Systems

This letter is being sent to inform you of the presence of a buried natural gas service, located between the gas meter and your home or business. This line is owned by you and is not maintained by the City of Waller.

This underground piping is subject to the potential hazards of leakage and corrosion (if metallic). This piping should be periodically inspected for these conditions and should be repaired if an unsafe condition is found to exist.

Local plumbing companies may be able to assist you in locating and inspecting these lines.

Before excavating near buried gas lines, please contact the City of Waller. The lines will be located and marked with yellow paint or flags. Excavations in these areas should be done by hand.

To report a gas leak or any gas emergency please call 936-372-3880, Monday through Friday 8:00 am to 5:00 pm or 832-768-0203 after hours, holidays, or weekends.
